Beyond Love

Beach House

Beyond love The first thing that I do before I get into your house I'm gonna tear off all the petals from the rose that's in your mouth Beyond love I wanted to find ever since I didn't understand They take the simple things inside you And put nightmares in your hands Beyond love This thing comes to me Heartbreak did this He was made to believe That he should live without it Our nerves would've seen No change in his Vision sprung into dreams Of a world left without it I really wanna know I really do breathe We really do breathe We really wanna know The last thing that she sees before they turn off all the light S Was there, net up in the corner with the spiders made of night We really wanna know Beyond love Our nerves would've seen And I can't live without it Could you ever believe Beyond love? I really wanna know I really wanna know
