Beyond love

The first thing that I do before I get into your house I'm gonna tear off all the petals from the rose that's in your mouth

Beyond love
I wanted to find ever since I didn't understand
They take the simple things inside you
And put nightmares in your hands

Beyond love
This thing comes to me
Heartbreak did this
He was made to believe
That he should live without it
Our nerves would've seen
No change in his
Vision sprung into dreams
Of a world left without it

I really wanna know I really do breathe We really do breathe We really wanna know

The last thing that she sees before they turn off all the light s

Was there, net up in the corner with the spiders made of night

We really wanna know

Beyond love

Our nerves would've seen

And I can't live without it

Could you ever believe

Beyond love?

I really wanna know I really wanna know
