

Without you nothing works.
Without you days turn always black.
You'll always be there for me.
You make me feel there's nothing wrong.
What I try to say ain't nothing new but I mean it.
This one is for you a nice day thank you.
You always bring my life that special lovely balance.
You are the big filter of my life.
Sometimes I've been full of hate, weakness, anger, frustration,
sadness - the world drags me down.
But you're around. You are the perfect drug.
You're around.
You are there and nothing sucks.
Tell me: Everything's gonna be alright ...
