

You Surround Me

Bebo Norman

There's never a day away from you
I'm not a complete mess
If I ever stay away from you
It's only emptiness
But love lasts longer
And love stands stronger
Than anything that's in between us
There's never a day away from you

Girl, you surround me
You're all around me
You capture me with everything you do
Girl, you surround me

There's never a day away from you
When I'm able to breathe
Whatever this world is coming to
I want you next to me
Because love lasts longer
And love stands stronger
Than anything that's in between us
There's never a day away from you

Girl, you surround me
You're all around me
You capture me with everything you do
Girl, you surround me
You're all around me
You capture me with everything you do
Girl, you surround me

And I know the sun will rise and fall
But we will make it through it all
I will love you until life is over
