You come over Don't talk Turn the T.V. on, off Disconnected Unaffected Better take the call

Showed you pictures of my home town A pin could drop from miles down What's the use in trying to be a girlfriend When we know just what we are

There's nothin' in common Except the bed we lay on

I won't be caught between something and nothing When you know that nothing is for free Cause in the end it's me who pulls the covers And it's empty in between

You're a habit I can't break
Disaster to eliminate
What part of no do I not understand
When you're not good for me

Cause I know we will never Be some kind of forever

I won't be caught between something and nothing When you know that nothing is for free Cause in the end it's me who pulls the covers And it's empty in between I'm the girl who needs it all or nothing How did we become a one night stand Hanging on a thread just isn't something That I want in the end

You come over yeah it's over Now we know just what we are

I won't be caught between something and nothing When you know that nothing is for free Cause in the end it's me who pulls the covers And it's empty in between I'm the girl who needs it all or nothing How did we become a one night stand Hanging on a thread just isn't something That I want in the end
