

Chemtrails

Beck

I can't believe what we've seen outside
You and me watching the jets go by

Down by the sea
So many people
They've already drowned
You and me watching a sea full of people
Try not to drown

So many people
So many people
Where do they go?
You and me watching a sky full of chemtrails
That's where we belong

All I can take from these scars is hope
But all I can see in this night are boats sinking

Down by the sea swallowed by evil
We've already drowned
You and me watching a sea full of people
They've already drowned

So many people
So many people
Where do they go?
You and me watching a sky full of chemtrails
Watching the jet planes go by

You and me watching
You and me watching
The chemtrails is where we belong
That's where we'll be when we die in the slipstream
We'll climb in a hole in the sky
