## **Evolution**

There's a law in what we do We got a quest for something new Everything you witness seems to let you down If someone gets you from behind I got an open mind And you've been thirsty for the friend you found

Close your eyes and make a wish I don't wanna mess with Mother Nature Knowing that you're mine You said, I could see You with another and we all get satisfied

It's a form of evolution It's a kind of movin' on An eternal source of pleasure in being the one When your love is for the giving It's a case of destiny You know, we look for the same insane games Got to be committal to a little deviation

So, I get all wound up inside I can see your scene unwind You dance together or you dance alone And leave the real world in the air Love it in leather, I don't care Everything is legal in the danger zone

Close your eyes and make a wish Later, we could cater to the animal Knowing that you're mine It's straight in my face You and your lover and the brain is paralyzed

It's a form of evolution It's a kind of movin' on It's a cycle of emotion, in being the one In the storm of revolution What is done, can be undone You know, we look for the same insane games Got to be committal to the subtle variations

Close your eyes and make a wish I don't wanna mess with Mother Nature Knowing that you're mine You said, I could see You with another and we all get satisfied

It's a form of evolution It's a kind of movin' on An eternal source of pleasure in being the one When your love is for the giving It's a case of destiny An eternal source of pleasure in being the one

It's a form of evolution It's a kind of movin' on

## **Bee Gees**

An eternal source of pleasure in being the one When your love is for the giving It's a case of destiny An eternal source of pleasure in being the one
