Flesh and Blood

I'm not that someone who's got what you want I can do nothing but watch what you do You just want someone to kiss you good night But lips are never enough to get you through

You stole my nights and you got your way And now you got me dying inside, oh baby

Ebony, don't walk out on me, listen to what I say Pick up the pieces of my life into the night of day How do you break this heart of steel, nobody ever could Open the pages of my life, I'm only flesh and blood

I'll be your savior but baby I swear I'm not living my life over you Some satisfaction you get if you dare But is it ever enough to get you through?

You stole my mind and you watch me fall Now you leave the scene of the crime, oh no

Ebony, don't walk out on me, I never thought you could I'm only what you make of me, I'm only flesh and blood I'm only flesh and blood

When you're gone, you'll leave me behind ... with nothing to hide Oh, lost in the night in a town without pity You learn how to cry, you learn how to cry

Ebony, don't walk out on me, listen to what I say Pick up the pieces of my life into the night of day How do you break this heart of steel, nobody ever could Open the pages of my life, I'm only flesh and blood

Gone are the days that came and went Houses are made of wood Live in a world of sand and stone I'm only flesh and blood

Ebony, don't walk out on me, I never thought you could I'm only what you make of me, I'm only flesh and blood
