

Find

Before Their Eyes

How can I make you see the price
How can I push you under
How can I lead you in the fight
Are you gonna take it farther

There's only so much that I can do
Is it enough to make it through
It's not up to me, it's up to you
Can reach for something

You can reach for something

Find what you gotta find
Just give it a try
(You're waking up, you're waking up)
Find what you gotta find
Just give it a try
(You're waking up, you're waking up)

How can I show you where to go
How can I give direction
I shouldn't tell you how to grow
You gotta learn your lessons

There's only so much that I can do
Is it enough to make it through
It's not up to me, it's up to you
Can reach for something

You can reach for something

Find what you gotta find
Just give it a try
(You're waking up, you're waking up)
Find what you gotta find
Just give it a try
(You're waking up, you're waking up)

You're in the dark so fight it
You've got a spark so light it
Find what you gotta find
Just give it a try
(You're waking up, you're waking up)

There's only so much that I can do
This is up to you
How can I let you win the fight
Aren't you gonna take it farther this time
Your word's enough
Your word's enough
How can I show you where to go

Find what you gotta find
Just give it a try
(You're waking up, you're waking up)
Find what you gotta find
Just give it a try

(You're waking up, you're waking up)

You're in the dark so fight it
You've got a spark so light it
Find what you gotta find
Just give it a try
(You're waking up, you're waking up)
