

The Nighttime Is Our Time

Before Their Eyes

It's nights like these
That we forget about
Everything that you've ever done
You are the barrel between my teeth
The blood stains on the sheets
Your everything I need (your everything I need)

Tonight's the night
We'll set this on fire right before your eyes
This time we'll get it right

It's days like these that we loose all hope
But the best is yet to come
And I know we're better off
We're better off... ALONE!

The Nighttime Is Our Time
