

You Talk A Good Game

Before Their Eyes

You changed the locks but you can't keep us out
Your looks and glances are but useless now

You know you act a fool
And we know exactly who you are
Don't cover up now

It will all come back to you
And knock you right off your feet
You talk a good game

You spin your wheels but you get nowhere fast
Step up, grow up, learn to loose with class

You shut us out, you shut yourselves out too
We can do this with or without you

You know you act a fool
And we know exactly who you are
Don't cover up now

It will all come back to you
And knock you right off your feet
You talk a good game

We see right through you and all of your lies
We wrote this tune so everyone would know

You know you act a fool
And we know exactly who you are
Don't cover up now

It will all come back to you
And knock you right off your feet
You talk a good game

This is the result of the mess that you've made
Turn around now look who's laughing in your face

You know you act a fool
And we know exactly who you are
Don't cover up now

It will all come back to you
And knock you right off your feet
You talk a good game
You talk a good game
