

Come Fly With Me

beFour

We have ignition it's time to go
A mission out of here
You're heart is beating
The light's go out
The thrill is in the air

Everything change in a second
And the darkness surrounds you like night
But just in a minute a million of stars comes alive

Come fly with me
Into infinity
Reach for the stars
They never been so close to you
You took a step
Into our fantasy
And we take you to the end of the galaxy
Come fly with me

A journey out of time and space
Can take you anywhere
Imagination fascinates,
The magic fills the air

Everything change in a second
And the darkness surrounds you like night
But just in a minute a million of stars comes alive

Come fly with me
Into infinity
Reach for the stars
They never been so close to you
You took a step
Into our fantasy
And we take you to the end of the galaxy
Come fly with me
