

Winterdream

beFour

Angel:

I watch the stars and see the moon
The snow is falling, we're together, forever

Alina:

I feel the wind under my skin
Oh it's so cold but we're together, forever

BeFour:

I dream my Winterdream
Like an old, old movie scene
Watching Santa's Reindeers in the Sky
With you by my side

I dream my Winterdream
Seems as real as it could be
When our planet turns to Wonderland
With you Hand in Hand

Manou:

It's like a winter fairytale
An open fire, we're together, forever

Dan:

We take a ride on our sleigh
Inside the darkness we're together, forever

BeFour:

I dream my Winterdream
Like an old, old movie scene
Watching Santa's Reindeers in the Sky
With you by my side

I dream my Winterdream
Seems as real as it could be
When our planet turns to Wonderland
With you Hand in Hand

I dream my Winterdream
Like an old, old movie scene
Watching Santa's Reindeers in the Sky
With you by my side

I dream my Winterdream
Seems as real as it could be
When our planet turns to Wonderland
With you Hand in Hand
