

# Make It Back to Me

Ben Haenow

I guess this isn't our time  
I guess this isn't our place  
I guess you made all the running, baby  
But I couldn't finish the race

You've been trying to hide it  
And I've been missing the signs  
While you were crossing your fingers and hoping  
I've just been crossing the lines

And if you gotta go, then I get it  
If you're gonna leave, then goodbye  
And there'll be no chance to forget it  
We are connected, you and I

As long as you make it back to me  
Take all the time you need  
You can love who you want  
You can love till you don't even think about me

As long as you make it back to me  
Right now I'm not what you need  
I can learn to be more than who I was before, wait and see  
Just make it back to me

Are you better without me?  
Are you falling apart?  
Are you reaching the end of the story?  
'Cos I'm trying to rewrite the start

And if you gotta go, then I get it  
If you gotta leave, then goodbye  
There'll be no chance to forget it, oh  
We are connected, you and I

As long as you make it back to me  
Take all the time you need  
You can love who you want  
You can love till you don't even think about me

As long as you make it back to me  
Right now I'm not what you need  
I can learn to be more than who I was before  
Wait and see  
Just make it back to me

For all the times I let you down  
And said I never would  
I right those wrongs, turn it around  
And love you like I should

For all the times I let you down  
And said I never would  
I right those wrongs, turn it around  
And love you like I should

As long as you make it back to me

Take all the time you need  
You can love who you want  
You can love till you don't even think about me

As long as you make it back to me  
Right now I'm not what you need  
I can learn to be more than who I was before  
Wait and see  
Just make it back to me
