

Way Back When

Ben Haenow

Honestly, what happened to you and me
Did all our stars just fall into the sea
Tell me girl
We used to wanna change the world
What happened to us
What's happened to us

Oh can we go back home
Tonight I gotta hold you close
I wanna let go

So give me that old school sound
I wanna drop the needle down
And take it back to way back when
You're talking when the sun lays down
And all of these lights fade out
Still you and me like way back when

Mm baby we fell behind
Well baby you still find time
To send those chills right down my spine
And tell them to hold the fire
We aint gonna go to the wild
Lets come back to life one last time

Oh can we go back home
Tonight I gotta hold you close
I wanna let go

So give me that old school sound
I wanna drop the needle down
And take it back to way back when
You're talking when the sun lays down
And all of these lights fade out
Still you and me like way back when

Yeah these are the days
Yeah we'll go back and save
And remember way back when

So give me that old school sound
I wanna drop the needle down
And take it back to way back when
You're talking when the sun lays down
And all of these lights fade out
Still you and me like way back when

So give me that woah
Woah
You and me like way back when
