

## Further Away

Ben Howard

My father he told me what goes around,  
Comes, comes around again  
The faces you see on the way up  
Are those on the way back down, my friend  
But you've been climbing shoulders around you  
Trying to reach the big blue sky  
And all above you is just the blackness, darling  
And everything below you dies  
And everything below you dies

You've been growing up  
You've been growing on  
Further away from us now  
[X2]

And nobody gives a f\*ck about you  
Tell you it's a damn shame  
The prettiest eyes in the whole world  
The same fool in the same game  
The same fool in the same game

You've been growing up  
You've been growing on  
Further away from us now  
[X3]
