

Baby Girl

Ben Jelen

Baby girl, time for waking
for your love, we've been aching
open up your eyes, dawn is breaking
Find the whole new world thats been waiting

In your dreams, be reborn
Through your sleep, free your soul

You'll never be left alone, you'll always be here at home,
We'll be holding you together, we'll remember how you shone
You'll soon be on your own way, you'll rise to a fresh new day,
When you run through fields of flowers, you'll recall from where you came

Daddy's girl, no more crying
In strong arms, you'll be lying
mother of the child, you'll be shining
newborn spark of life, soon arriving

as she dreams, with a kiss
from all of us, tell her this

You'll never be left alone, you'll always be here at home,
We'll be holding you together, we'll remember how you shone
You'll soon be on your own way, you'll rise to a fresh new day,
When you run through fields of flowers, you'll recall from where you came

believe in circles
believe in grace
we'll miss you daughter
miss you sister
miss you lover
miss you friend

baby girl, time for waking
for your love, we've been aching
open up your eyes, dawn is breaking
Find the whole new world thats been waiting
