

Pulse

Ben Jelen

Recreating new beginnings
From the static comes new meaning
Feel the rhythm pulsing through the science
One by one connecting who we are

Ah, ah

Overtaking evolution
God forgive our random motion
Growing is the fear throughout the masses
Weakening the pulse for everyone

Ah, ah

And as one we'll learn to curve before we break
As our pulse is growing stronger with each day

Ah

And if days should try to part us, we will curve
'Cause together is what gives our days their worth

Feel the smallest changes, within ourselves within our pulse
I feel it all around me, 'cause it's inside us and it surrounds
us
And as one we'll learn to curve before we break
