

# Numb

Ben Lee

I'm in surgery  
It's an emergency  
It just occurred to me  
Ironically I caught a disease  
They take a piece of me  
Enjoy the scenery  
Counting back from ten but  
I will never fall asleep

I refuse to go numb  
I refuse to go numb  
I refuse to go numb  
So let the music come  
Let the music come  
Let the music come

I'm writing pop songs  
Done it for so long  
Sometimes I dream about  
A chorus that's so clever it's dumb  
And now they're telling me  
The music industry  
You can stay if you behave  
Be a good boy go to sleep

I refuse to go numb  
I refuse to go numb  
I refuse to go numb  
So let the music come  
Let the music come  
Let the music come  
I refuse to go numb  
I refuse to go numb  
I refuse to go numb  
So let the music come  
Let the music come  
Let the music come

So if you're asking me  
What you mean to me  
This is a dream to me  
A theme for me  
I gotta believe  
In what you're telling me  
In what you're selling me  
In what's compelling me to feel  
The only reason I need  
Here comes the drum beat  
I'm moving my feet  
The only reason I need  
The only reason I need  
And a guiter chord  
I feel so sure  
The only reason I need  
The only reason I need

I refuse to go numb

I refuse to go numb  
I refuse to go numb  
So let the music come  
Let the music come  
Let the music come

I refuse to go numb  
I refuse to go numb  
I refuse to go numb  
So let the music come  
Let the music come  
Let the music come
