

Fall

Berlin

Where do we go from here?
The Sun is shining
Look into a nighttime sky
A star is calling
As seasons change
Why are you so afraid?
In darkness you'll see a new light

Fall, fall in love
Fall, fall in love

You know, I can't read your mind
If never spoken
Tell me if it hurts too much
The door is open
Colors all around
Smile, cry, then laugh out loud
Feel the Autumn breeze
Come alive

Fall, fall in love
Fall, fall in love

Where do we go from here?
I'll stay by your side
And if you choose a different path
We'll say, goodbye
Open your heart
A shooting star could shine and touch you
Here comes a light
Your star will shine again

Fall, fall in love
Fall-fall in love
Fall, fall in love (your star will shine again)
Fall, fall in love (your star will shine again)
Fall, fall in love (your star will shine again)
Your star will shine again
Your star will shine again
Your star will shine again
