

Uncle Sam

Berlin

They say the man is hiding
They say he's losing money
See him with the president
They say the man is...dying

He's running out

You know he's not a communist
He makes deals with the wrist
Killed the boys in Vietnam
Running with the gas masks on

He's running out
He's running out
He's running running out

When there was napalm
You never see him anywhere
You just see him everywhere
He visits with the Shaw!

He bought out Jimmy Carter
He's going after Kennedy
But what'chu gonna do
when he comes after...you?

He's running out
He's running out

He's running out-he's running out
He's running out-the man is running out
The man is running out-the man is running out

They say the man is hiding
They say he's losing money
See him with the president
They say the man is...dying

running running running running out

He's running out
He's running out
