I travel through the years
I try to cope with all my fears
And wander through this time and space
But never do I find my place

Float through this galaxy
With all the thoughts that anchor me
My riches, oh, I surely would
Trade them if I only could

Feel you I wish I could feel you

I travel round the sun
I turn my back on everyone
I wish there'd only be a way
To find some place I'd wanna stay

Of all my sorrow and distress I mostly fear the emptiness And no one's ever understood And how we'd wish we only could

Feel you I wish I could feel you

I wish I could feel you

I wish I could feel you

Give me some place to hide in

No shifting sands or skies on fire

Give me some place to hide in

No closing walls, but just a light to light the way

Feel you

I wish I could feel you

I wish I could feel you

I wish I could feel you

I wish I could
