

## The Road

Best Coast

I remember when I was younger  
I used to sit around and think about you  
And though I'm older I still wonder  
Where you are and do you think about me

Though the road has changed  
We are still the same  
I wish we could make it work  
But you're already gone

Do you remember when you told me  
That you would love me forever  
So how come now when I see you  
You act like you don't even know me

Though the road has changed  
We are still the same  
I wish we could make it work  
But you're already gone  
Already gone
