## We Could Run

On television, kings and queens Live the lives of people's dreams You and I are human beings Living, breathing beings There are rules that I'm in to break You could call this a great mistake We could always play it safe But that's no fun

We could run We could run

Hold me close and hold me fast I'd never thought you'd ever rest Some moments were meant to last But this ain't one

We could run

This is the last time, I mean it The final dance of the evening They couldn't call the final ball

We could run We could run We could run We could run We could run

We could run

**Beth Ditto**
