

# Moon

Beth Orton

I know what the sun feels like on my skin  
I wanna know what moon feels like within  
I know what the sun feels like on my skin  
I wanna know how the moon gives life within

And the same moon rises over me as you  
And there is not really much about that that we can do

I see a light, ain't it bright?  
Keeps me up all night  
I see a light, ain't it bright?  
Keeps me up all night

And there is light that I can only see by the light of the moon  
And there is light that I can only want more than I do  
And there is light that I can only feel when I'm with you  
And the same moon rises over me as you

And there is really not much about that that we can do  
No, there is really not much about that that we can do

I see the light, ain't it bright?  
Keeps me up all night  
I feel the light burning bright  
I see the light, ain't it bright?  
Keeps me up all night  
Keeps me up all night  
Keeps me up all night

And I listen to the grass grow  
And I wonder what I don't know

And I listen to the grass grow  
And I wonder what I don't know  
And there's really not much about that that I can do

Well the same moon rises over me as you  
I see the light, ain't it bright?  
Keeps me up all night  
I see the light, ain't it bright?  
Keeps me up all night  
I see the light, ain't it bright?  
I feel the light, ain't it bright?  
Keeps me up all night
