

# Alone Again

Betty Who

Get away anywhere but here  
I'm gonna give you a break  
Driving til you disappear and maybe then you'll say  
Don't ever leave me alone again  
You say those three little words,  
I guess the same as saying you like my hair when I work this wa  
y  
But you don't seem to care  
I don't want to end up alone again

So come a little closer closer  
Let me know if you're coming over over  
I'll make sure to leave the lights on lights on  
You come under me like a little love song love song,  
Won't you please just tell me what you want  
I'm waiting all along for youuu youuu to tell me what you need  
So baby we can be alone again

Waiting for you to come around it's like waiting for rain  
And then hear you low dropping, when it rain to pours  
Won't you drown me out of love again  
But it comes a day when you're fast asleep, and  
You call out my name cause you needed me  
I'd be there first to say never have to be alone again

So come a little closer closer  
Let me know if you're coming over over  
I'll make sure to leave the lights on lights on  
You come under me like a little love song love song,  
Won't you please just tell me what you want  
I'm waiting all along for youuu youuu to tell me what you need  
So baby we can be alone again

So come a little closer closer  
Let me know if you're coming over over  
I'll make sure to leave the lights on lights on  
You come under me like a little love song love song,  
Won't you please just tell me what you want  
I'm waiting all along for youuu youuu to tell me what you need  
So baby we can be alone again
