

# Perfect Dark

## Beyond Twilight

I see beauty  
I feel love  
But when I touch it  
I burn Deep is the sky

White is the sea  
But windows and doors have been closed  
For so long And it's perfect dark  
It's perfect dark here

Where the angels scream Give me a reason  
What's this all about?  
I am sorry I don't understand  
We pray to our God as we dance with the Devil Hold the candle

Pass the flame  
We're all in this together Cosmic winds are gathering  
Coming your way  
Telling you - you are only a fragment

A fragment of time And it's perfect dark  
It's perfect dark here  
Hear the angels screaming I can't go on carrying the pain Follow the philoso  
pher  
Is he God or Lucifer?

It's written in the sky  
A prophecy for you and I Electrical insects  
With nowhere to go Asking the question why  
Religion might just be a lie

Believer, take your fix  
Crawl up on your crucifix I've found the answer  
I have the key  
Experience reality

And the world will see That it's perfect dark  
It's perfect dark here  
In the Devil's hall of fame Before me now  
I see a dying planet

Captured souls  
With microchips implanted  
And it's perfect dark  
In the Devil's hall of fame There must be a way

I'm waiting - waiting for the day  
Hellfire  
Hellfire  
Higher

Higher  
Only blood remains  
There is nothing more to gain
