

Spinning around an open space  
Until our heads forget the ride  
Feel like I can  
Feel like I can  
Once again we rise from the grave  
In the street wide open  
Space between the stars and the end  
Let's embrace this moment  
And it's the end of something new  
You'll be there  
Our hearts collide for something new  
You'll be there  
But it's the end of something  
Spinning around an open space  
Until our heads forget the ride  
Feel like I can  
Feels like I am  
Feel like I can  
Even if the stars fall on me  
My heart is yearning for  
My heart, my heart is yearning for  
My heart, my heart is yearning for my heart, my heart  
Is yearning for my heart
