

Gently

Biffy Clyro

Spinning around an open space
Until our heads forget the ride
Feel like I can
Feel like I can
Once again we rise from the grave
In the street wide open
Space between the stars and the end
Let's embrace this moment
And it's the end of something new
You'll be there
Our hearts collide for something new
You'll be there
But it's the end of something
Spinning around an open space
Until our heads forget the ride
Feel like I can
Feels like I am
Feel like I can
Even if the stars fall on me
My heart is yearning for
My heart, my heart is yearning for
My heart, my heart is yearning for my heart, my heart
Is yearning for my heart
