

On a Bang

Biffy Clyro

Oceans of red
Oceans of darkest red
I can predict the future
I will predict the future
What you don't know
Is none of your concern
You only fuck dumb creatures

Blame the science
Just don't blame mother nature
She's kinda frightening We're only watchers here and
Now you know better
Why can't you fucking do better?
Now you know better
Why can't you fucking do better?

I gave my heart
Open a locked door What is your contribution?
Where is it in your skull? Time doesn't heal
It just makes deal with this Where is your shitty future?
You motherfucker

Blame the science
Just don't blame mother nature
She's kinda frightening We're only watchers here and
Now you know better
Why can't you fucking do better?
Now you know better
Why can't you fucking do better?
Now you know better
Why can't you fucking do better?
Now you know better
Why can't you fucking do better?
Now you know better
Why can't you fucking do better?
Do better
