

# All Fall Together

Big Country

I forget how it started  
But everyone knew of the cause  
Hard out of the sun  
With a vengeance and all was then lost

They crawled into homes  
Yet all of the old ways were gone  
It left nothing to run to  
But no one can help how they're drawn

We will all fall together  
A black sky in the rain  
And you can laugh and I will sing  
We've changed forever

Survivors set out on a trail in a search for salvation  
Looking for remnants of sense in the end of a nation

We will all fall together  
A black sky in the rain  
And you can laugh and I will sing  
We've changed forever

All fall together  
A black sky in the rain  
And you can laugh and I will sing  
We've changed forever

All came together and steadied themselves on the shore  
Knowing the terror would find them much worse than before

We will all fall together  
A black sky in the rain  
And you can laugh and I will sing  
We've changed forever

With nothing to live for and nothing more left of your pride  
Can you face all the black in your heart that will not be denied

We will all fall together  
A black sky in the rain  
And you can laugh and I will sing  
We've changed forever

We will all fall together  
A black sky in the rain  
And you can laugh and I will sing  
We've changed forever

We will all fall together  
A black sky in the rain  
And you can laugh and I will sing  
We've changed forever
