I forget how it started
But everyone knew of the cause
Hard out of the sun
With a vengeance and all was then lost

They crawled into homes
Yet all of the old ways were gone
It left nothing to run to
But no one can help how they're drawn

We will all fall together A black sky in the rain And you can laugh and I will sing We've changed forever

Survivors set out on a trail in a search for salvation Looking for remnants of sense in the end of a nation

We will all fall together A black sky in the rain And you can laugh and I will sing We've changed forever

All fall together
A black sky in the rain
And you can laugh and I will sing
We've changed forever

All came together and steadied themselves on the shore Knowing the terror would find them much worse than before

We will all fall together A black sky in the rain And you can laugh and I will sing We've changed forever

With nothing to live for and nothing more left of your pride Can you face all the black in your heart that will not be denied

We will all fall together A black sky in the rain And you can laugh and I will sing We've changed forever

We will all fall together A black sky in the rain And you can laugh and I will sing We've changed forever

We will all fall together A black sky in the rain And you can laugh and I will sing We've changed forever
