

## Longest Day

## Big Country

I've had enough, give me the strength to carry on  
Bring me my dove, be my shelter from the storm  
Oh, let me be, let me keep my life my own  
Just let me see a way for me to be alone  
I need a friend, I need a place where I can hide  
I'm lost again, I need a spell to turn the tide

But like the dog that howls in the night  
You fill my broken heart with fright  
When I touch you the whole world sighs  
When you touch me the whole world cries

The longest day will be forever and a lifetime  
The longest day will try your love like none before  
But I must stand and I must fight  
For what is wrong is now my right  
The longest day will fill my life forevermore

Will I lie, will I face the fire in you  
Or will I fly, will I find out what is true  
I will be there, I will be waiting there for you  
And who will care when we have done what we must do

But like the dog that howls in the night  
You fill my broken heart with fright  
When I touch you the whole world sighs  
When you touch me the whole world cries

The longest day will be forever and a lifetime  
The longest day will try your love like none before  
But I must stand and I must fight  
For what is wrong is now my right  
The longest day will fill my life forevermore

I could use some love  
I could use some kissing  
I could use some gloves  
Or maybe just some lessons

I've had enough, give me the strength to carry on  
Bring me my dove, be my shelter from the storm  
I will be there, I will be waiting there for you  
And who will care when we have done what we must do

The longest day will be forever and a lifetime  
The longest day will try your love like none before  
But I must stand and I must fight  
For what is wrong is now my right  
The longest day will fill my life forevermore
