## **In Green Fields**

**Big Drill Car** 

Critters... I saw something I want And the thought of her still haunts And it won't go away

I was so tongue tied I didn't know what to say Now I'm miles from you And I don't think you knew How could you though

My mind moved fast but my tongue moved much too slow And it's hard to say from far away I want to see you in green fields In green fields

A doll like face You know she ran the place And that was cool I didn't make a move for fear of looking fool

And now I'm sad, she's the best thing I never had And that's not right It's been three months and I still lose sleep at night And it's hard to say from far away

I want to see you in green fields In green fields Her face it shined, oh man she looks so fine But I move slow

Saw her at the door and I hope I'll see some more But I don't know Next time you're there, please let her know I care And that should be fine, I know I will get back there in time

And when I do, I'll see her walking through them green fields, yeah And it's hard to say from far away I want to see you in green fields In green fields

In green fields In green fields
