

## Never Far Away

Big & Rich

It's so dark in here, I can't begin  
To find a shred of light, this place I'm in  
But even in this cold  
I can still find beautiful

'Cause you're never far away  
No you're never far away  
I close my eyes and then, there you are again  
Never far away, never far away

The chill in here, collecting on my skin  
Reminds me I'm alive, I gotta try again  
And when there's nothing left  
I just look inside myself

'Cause you're never far away  
No you're never far away  
I close my eyes and then, there you are again  
Never far away, never far away

Walking through these halls, it wears me down  
All these people with their foolish frowns  
But when I need to hear, sweet music in my ear

No you're never far away  
No you're never far away  
I close my eyes and then, there you are again  
Never far away, never far away  
Never far away
