Wolves

Big Wreck

Oh mark my words
In between the lines
In every little piece
Of the stories entwined

I always told my side my way

Oh there's no more room
In the packet of wolves
They wouldn't let me in
So the mission was afoot
They showed us all we were without

They said bleed out your heart
If it's still beating
For someone else
Drop all those chains
That keep you tethered
That keep you safe

Rosy little world
In your pocket of wolves
A cosy little hang
In the back of your school
those stories always get so old

Well there is that one night
Going off that grid
I never said you didn't
I never said you did
But all of my favourite stories
Are about you

I said bleed out your heart
If it's still beating
For someone else
Break all those chains
That keep you tethered
That keep you safe

I said bleed out your heart
If it's still beating
For someone else
Drop all those chains
That keep you tethered
That keep you safe

Bleed out your heart
If it's still beating
For someone else
Break all those chains
That keep you tethered
That keep you safe
