

It's time to put God away
It's time to put God away
It's time to put God away
It's time to put God away

Damnin' the children
Makin' the ill just a little more sick

It's time to put God away
It's time to put God away
It's time to put God away, I put God away
It's time to put God away, I put God away

This is the end of faith, no more must I strive
To find my peace, to find my peace in a lie
This is the end of faith, no more must I strive
To find my peace, to find my peace in a lie

It's time to put God away
It's time to put God away, I put God away
It's time to put God away
It's time to put God away, I put God away

For a void without a question is just perverse
A void without a question is just perverse
Like tear gas misters at my grave

It's time to put God away
It's time to put God away
It's time to put God away, I put God away
It's time to put God away, I put God away

For a void without a question is just perverse
This is the end of faith, no more must I strive
To find my peace, to find my peace in a lie
This is the end of faith, no more must I strive
To find my peace, to find my peace in a lie

It's time to put God away
It's time to put God away, I put God away
It's time to put God away
It's time to put God away, I put God away
