

Faith-void

Bill Callahan

It's time to put God away
It's time to put God away
It's time to put God away
It's time to put God away

Damnin' the children
Makin' the ill just a little more sick

It's time to put God away
It's time to put God away
It's time to put God away, I put God away
It's time to put God away, I put God away

This is the end of faith, no more must I strive
To find my peace, to find my peace in a lie
This is the end of faith, no more must I strive
To find my peace, to find my peace in a lie

It's time to put God away
It's time to put God away, I put God away
It's time to put God away
It's time to put God away, I put God away

For a void without a question is just perverse
A void without a question is just perverse
Like tear gas misters at my grave

It's time to put God away
It's time to put God away
It's time to put God away, I put God away
It's time to put God away, I put God away

For a void without a question is just perverse
This is the end of faith, no more must I strive
To find my peace, to find my peace in a lie
This is the end of faith, no more must I strive
To find my peace, to find my peace in a lie

It's time to put God away
It's time to put God away, I put God away
It's time to put God away
It's time to put God away, I put God away
