## Faith-void

## **Bill Callahan**

It's time to put God away It's time to put God away It's time to put God away It's time to put God away

Damnin' the children Makin' the ill just a little more sick

It's time to put God away It's time to put God away It's time to put God away, I put God away It's time to put God away, I put God away

This is the end of faith, no more must I strive To find my peace, to find my peace in a lie This is the end of faith, no more must I strive To find my peace, to find my peace in a lie

It's time to put God away It's time to put God away, I put God away It's time to put God away It's time to put God away, I put God away

For a void without a question is just perverse A void without a question is just perverse Like tear gas misters at my grave

It's time to put God away It's time to put God away It's time to put God away, I put God away It's time to put God away, I put God away

For a void without a question is just perverse This is the end of faith, no more must I strive To find my peace, to find my peace in a lie This is the end of faith, no more must I strive To find my peace, to find my peace in a lie

It's time to put God away It's time to put God away, I put God away It's time to put God away It's time to put God away, I put God away
