

## Time Flies

Billy Ray Cyrus

It's living in the moment today  
Got down on the floor and played with my little girl  
For a little while  
It's crazy how much she's grown

It seems last I looked, she was so small but she sure ain't now  
But she's around that age her first memories are made  
Oh, I remember being that young once  
I think it was yesterday

Time flies  
Blows by  
Feels like I've missed so many things

Time flies  
And sometimes  
God, I wish You'd clip its wings

Another day is winding down  
There you stand in that cotton gown  
The one you wore when we first made love  
Back when this was just a dream, no house, no kids

The only thing we had then was us  
And babe, I can't help but miss that now and then  
'Cause all those old tomorrows  
Ain't coming back again

Time flies  
Blows by  
Feels like I've missed so many things

Time flies  
And sometimes  
God, I wish You'd clip its wings

Time flies  
God I, God, I wish You'd clip its wings  
God, why can't you clip its wings?

Time flies  
Time flies
