

Touchy Subject

Billy Ray Cyrus

I'll sit and talk baby all night long
We can discuss whatever you want
We'll share our secrets our little white lies
Before we're through we'll be bona fide worldly-wise
But ththere's one thing I wanna leave in the past
So don't bring it up don't even ask

Cause that's a touchy subject let's not talk about it
Right now I can't explain it I'm better off without it
Oh I'm begging you please
Don't even whisper one little word about love
Cause that's a touchy subject with me

Don't take the shine off our moment together
It's way too soon to talk about forever
Go ahead and get a little closer to me
But darlin' won't you do me one courtesy
Let's hold off on our wants and our needs
We both know right where that leads

And that's a touchy subject let's not talk about it...

Touchy subject it hurts to talk about it
It starts rainin' mem'ries and I feel like I'm drownin'
Oh I'm beggin' you please
Don't even whisper one little word about love

Cause that's a touchy subject let's not talk about it
Right now I can't explain it I'm better off without it
It's a touchy subject let's not talk about it
Can't explain it it's a touchy subject
