

What About Us

Billy Ray Cyrus

I still don't understand how things got out of hand
One day you looked away, next thing I heard you say
Goodbye, oh, goodbye

What about love, what about faith
What about the kids and what they would think
What about tears, what about time
What about the day you said you were mine
Hey, what about us?

I know the past is past and though it hurts to ask
These teardrops in my eyes say all the reasons why
Oh, why, tell me why

And what about love, what about faith
What about the kids and what they would think
What about tears, what about time
What about the day you said you were mine
Hey, what about us?

What about us?

What about love, what about faith
What about the kids and what they would think
What about tears, what about time
What about the day you said you were mine
Hey, what about us?

What about us?
What about love?
What about tears?
