What About Us

Billy Ray Cyrus

I still don't understand how things got out of hand One day you looked away, next thing I heard you say Goodbye, oh, goodbye

What about love, what about faith What about the kids and what they would think What about tears, what about time What about the day you said you were mine Hey, what about us?

I know the past is past and though it hurts to ask These teardrops in my eyes say all the reasons why Oh, why, tell me why

And what about love, what about faith What about the kids and what they would think What about tears, what about time What about the day you said you were mine Hey, what about us?

What about us?

What about love, what about faith What about the kids and what they would think What about tears, what about time What about the day you said you were mine Hey, what about us?

What about us? What about love? What about tears?
