It Keeps You Rockin'

Billy Squier

When the lights blow and anything goes and nobody knows When the sparks fly from in your eye and you don't know why In a tight squeeze, you're on your knees, you're into the freez e Then the right sound can bring you 'round, put your right side down It keeps you rockin' On a hot night you feel all right, you're wound up tight On the next day you over-play, wanna fade away In a cold rain, your love in vain, make you go insane Bring you right down and turn you 'round, gotta hear that sound It keeps you rockin' Take this flight, wherever it takes you Wrong or right, don't let it shake you Fight the fight, whatever it makes you That's all right, I know you can break through In the right crowd you act so loud, got your head in the clouds It's a far cry from the days gone by, it ain't no lie Out the back door, you make the score, you come back for more Find the right song, it won't be wrong, you can sing along It keeps you rockin'
