

Love Was Still Around

Billy Talent

Alive and right before your eyes
It's easy to think twice
A choice can change your life

Angry fists, angry eyes
That should take them by surprise
And unleash all your demons upon them

With your guns and your knives
Left them fighting to survive
You're the villain but you play the victim

Never took no advice
Did you ever realise
that your violence had taken your virtue
Well you can't wash away
the mistakes of yesterday
when the boys wearin' blue come to greet you

And I can hear the sirens still callin' your name
And I can see the ashes rise up from the flames
When love was still around
When love was still around
One day before it all came crashing down

Did you stop and regret
when the voice inside your head
got so quiet that you'd hear a pin drop
Did you still like the view
when the guns were aimed at you
screaming "Out of the house with your hands up!"

Now you wait in the line
for the prison bell to chime
singing "I fought the law, but the law won"
When you're done serving time
you can look them in the eyes
while you count all the lives that you've broken

And I can hear the sirens still callin' your name
And I can see the ashes rise up from the flames
When love was still around
When love was still around
One day before it all came crashing down

And I can see the flashing lights take you away
And now the tears are rollin' down your mother's face
When love was still around
When love was still around
One day before it all came crashing down

When love was still around
When love was still around
Some day you'll see the life that you turned down

And I can hear the sirens still callin' your name
And I can see the ashes rise up from the flames

When love was still around
When love was still around
One day before it all came crashing down

And I can see the flashing lights take you away
And now the tears are rollin' down your mother's face
When love was still around
When love was still around
One day before it all came crashing down

When love was still around
When love was still around
One day before it all came crashing down

When love was still around
When love was still around
Some day you'll see the life that you turned down

Alive and right before your eyes
It's easy to think twice
A choice can change your life
