

Waking up cold in the morning
Gotta keep moving, gotta keep breathing
Keep sucking through my teeth
I am alive, but for the time being
I never wanted anything but this
So don't let me down

Let me have what I want
Just once it's enough to pick me up
Kick me out, steal back the vanity
Now we are kept buried like dead
I never wanted anything but this

But I could try
Silence is our master
Try
Silence is our master

Speak now, throw your words on me
It's a red flag begging for a fight
Whip crack leave a mark upon the skin
Perfect love is bare
And I never wanted anything but this
So don't let me down

Always in the way I'm in a state
I'm in your slaughterhouse
So that the blood turn the water red
And never let them out
See the sights, ten billion lives
Their hearts and souls separating
At the speed of light

Silence is our master
Try
Silence is our master
