

So Good

Black Buddafly

I want you right baby
Don't ever leave
Things aint the same when you go
Just like a shield from the back
You're protecting me
And these are things that I know
Together we ride, we ride
You give me green light, green light
Feel like I can do whatever
I want to do with you and
Nothings impossible

With you I can climb mountains
High to the top and I
Can make it through the sea
Whenever I take fright
You make it alright
Just by staying next to me

You make me feel good
When I'm low and feel like breaking
Down on the floor
And lifting me up when
Everything else feels like I can't
Take no more
You make it so good good good good good
Good good good good good
Good good good good good
Good good good good good
Good
You make me feel so good

And it's like you show me the way to the light
Take me back into the day
Give me the strength and when I cry
You wipe my tears away
And when I wanna
Give up, give up
You pull me
Closer, closer
Feel like I can do whatever
I want to do with you and
Everything is possible

Feels like I can make it through the storm
You always keep me warm
From winter into spring
Whenever I'm in pain
You shine it away
Just like it's nothing

You make me feel good
When I'm low and feel like breaking
Down on the floor
And lifting me up when
Everything else feels like I can't
Take no more

You make it so good good good good good
Good good good good good
Good good good good good
Good good good good good
Good
You make me feel so good

Ooohhh
So goood
Ahhh yeah

Anything I need you got me babe
Tell you whatever I want
And you make it
Good when you always know what to do
No matter what the situation
You make it worth while

With you I can climb mountains
High to the top and I
Can make it through the sea
Whenever I take fright
You make it alright
Just by staying next to me

You make me feel good
When I'm low and feel like breaking
Down on the floor
And lifting me up when
Everything else feels like I can't
Take no more
You make it so good good good good good
Good good good good good
Good good good good good
Good good good good good
Good
You make me feel so good
Good good good good good
Good good good good good
Good good good good good
Good
You make me feel so good

You make me feel so
Aaahh, ahh
You make me feel so
Aaahh, ahh
You make me feel so
Aaahh, ahh
You make me feel so
