## I Can See Your Spirit

## **Black Country Communion**

You're automatic So wild to thrill You say you won't But I know you will You're so dramatic How can it be? So full of life And energy! No need to panic Don't feel your age L hear you live in A golden cage You get so manic You get so spun Get out my You're a loaded gun Come around midnight L pull down my guard L want to feel it I CAN SEE YOUR SPIRIT So psychedelic Right to the core I'm gonna tie you down To the floor You' re so angelic My little Queen High from above In a Time Machine You're so electric So far and wide Your Majesty Won't you be my guide? You are connected So deep within Now can't you see By the shape I'm in? I see the sacred walls That surround you I see from 10 miles I'm so high ... high
