

# Hole In The Sky

Black Lab

get yourself a monkey wrench  
cross the boarder,  
go out past the edge of town  
slip, slide on the salt flats  
curse yourself if you think it helps  
don't bother to wait for me when i'm gone  
strip mined in the outback

cause i'm steppin off the ledge  
jumpin out the window  
fallin through a hole in the sky  
i see the long hair down your back  
braided up in corn row  
you move your lips,  
as if to say goodbye

now back down at the courthouse  
it's like sittin up straight in church  
sit blind in the dark  
at the circus after hours  
they're throwing knives  
but nobody's gettin hurt  
sit beside me,  
just a little left of the mark

cause i'm steppin off the ledge  
jumpin out the window  
fallin through a hole in the sky  
i see the long hair down your back  
braided up in corn row  
you move your lips,  
as if to say goodbye  
fallin through a hole in the sky

how much time you gonna waste  
how much ink must be erased  
before you see the things before you  
how many times you gonna run  
how many games must be begun  
before you hear the one behind you  
calling to remind you

as you're steppin off the ledge  
jumpin out the window  
fallin through a hole in the sky  
i see the long hair down your back  
braided up in corn row  
you move your lips,  
as if to say goodbye  
fallin through a hole in the sky
