

# Wash It Away

Black Lab

Wash it in the sea  
Let it soak all night  
Wash it in the sea  
Let the saltwater wash it away

Soak it in bleach  
Till it's white on white  
Soak it in bleach  
Till the blood just washes away

Hang it in the wind  
Let it blow all night  
Hang it up high  
Let the high wind blow it away

Hang it in the wind  
Let the sun burn bright  
Hang it in the wind  
Till the blood just washes away

I have waited wasted years  
For the child that's come and gone today  
Say what about this wasted fear?  
How can I just turn and wash it away?

If I can then I will, then I will wash it away  
If she can then she will wash it away  
If I can then I will, then I will wash it away  
If she can then she will, wash it away

Forty years spent one by one  
Forty years of life just slipping away  
What I'd give for a firstborn son  
Forty years of blood just washing away

I have waited wasted lives  
I have waited long enough I'd say  
Say what about this wasted child?  
How can I just turn and wash it away?

If I can then I will, then I will wash it away  
If she can then she will wash it away  
If I can then I will, then I will wash it away  
If she can then she will, wash it away

So send me an angel  
Send me the ghost that I was  
Send me an angel  
Send me the ghost that I was  
That I was, that I am  
I will wash it away

She will wash it away  
I will wash it away  
If I can then I will, then I will, then I will  
Yeah, yeah, yeah, yeah, yeah  
Uh yeah, yeah, yeah, yeah, yeah
